

# Lean Foundation Training Online

## *Course Code TGLAU001E*

This online lean training course is ideally suited to people who don't have the opportunity to attend our delivered training courses and for smaller organisations that need a cost effective solution to getting this invaluable knowledge applied quickly and effectively.

Using CGI motion graphics and an engaging presentation style, the video modules are informative, accessible and entertaining. Combined with the extensive course manuals and supporting materials this is true innovation in online learning that gets close to the experience of attending a live training course.

- HD video streaming
- Informative, accessible and entertaining
- Comprehensive downloadable manuals and resources
- Online exam
- Online certificate

The videos can be viewed on desktops, laptops and mobile devices.  
Total running time approximately 1 hour 50 minutes.

The 12-part video series will take you through the ideas behind Lean Thinking and details of the core approaches and tools used. This foundation training course provides the detail required to start implementing Lean. Learn all about Lean Manufacturing and Lean Management and how Lean can be applied in Services as well.

## *Supporting materials include:*

- Lean Foundation Course Manual
- 5S Application and Implementation Guide
